SUB: COMPUTER SCIENCE
CLASS - XII

Project Work

Create a Student Information System using Python as Front end and Data file (text/binary/csv) as Back end to perform following operation:

1.   Add Record
2.   Display Record
3.   Append Record
4.   Modify Record
5.   Search Record
6.   Delete Record
7.   Exit

The data of Student Information System will be:

(a) School No
(b) Name
(c) City
(d) Fee
