

SAINIK SCHOOL GOPALGANJ

CLASS – XII

SUB: ENGLISH

While the whole nation is grappling with Covid-19 lockdown, it is imperative for the students to shift their focus to a new normal study environment. They should find their ways to engage and explore themselves constructively at homes. On the education front, even though schools are trying their best to bridge the gap by providing online education, some of the students are found missing it showing their inability to access to the required equipments or internet connection. Sometimes it is also seen that because of the ignorance of parents, the children put themselves at the risk of unsupervised access to various unsuitable websites and even fall prey to the cyber bullying. In spite of all, the lockdown has been providing ample opportunities for the children to explore and engage themselves qualitatively. Keeping in view of the points mentioned above, write your experience describing your involvement in the family, society and above all your involvement in your personal growth. (Word Limit: 1000 words)
